Introduction
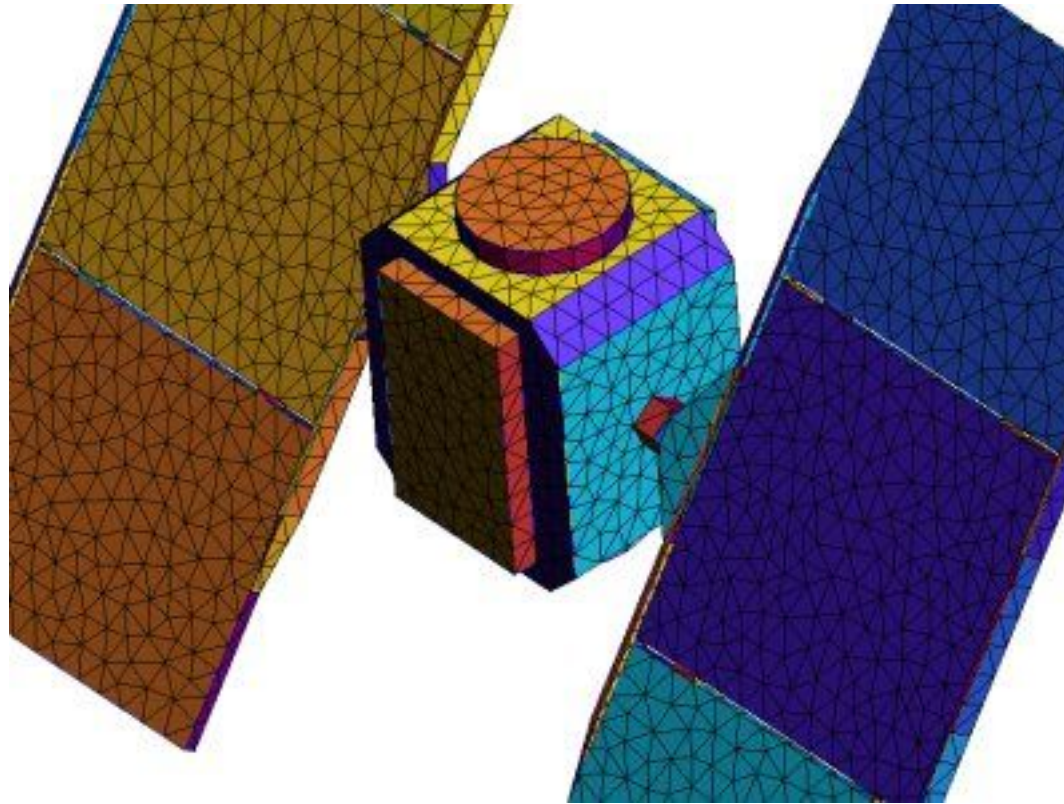

What's a template ?

- ✓ It's a LibreSource resource that allow the creation of a set of organised resources.

What's for ?

- ✓ For a standard project creation
- ✓ For a specific and repetitive use of specific resource organisation with specific rights.

Templates

Standard template

edit this menu

Standard template
ls://ganesh.artenum.com/templates/basicProject

List children | Edit this Template | Create new Resource | Template security

How to create a new project using this template

You have to choose the URI of the project

You should create the project under the /projects node. For example the URI could be **/projects/myNewProject**.
Be sure to have the **CREATE** permission at node /projects.

Sample

Create your own dev

Template for research
ls://ganesh.artenum.com/projects/spine/home/spis/software/workshops/communityWS/research/template

List children | Edit this Template | Create new Resource | Template security

In order to create your own project please instantiate the current template with such URI where "myProject" will be the url name of your project.

/projects/spine/home/spis/software/workshops/communityWS/research/**myProject**

Instance uri : [_____]   create instance

Artenum.com

Conclusion

What to do ?

- ✔ Go to the template that you want to use
- ✔ Full fill your wanted URI
- ✔ Create new instance
- ✔ The set of resources will be automatically created
- ✔ Edit the name of the root of your resource set
